Spring, 1913

Thomas Meehan & Sons

Nurserymen and Tree Seedsmen

DRESHER, PA., U. S. A.

Cable Address Meehan, Ambler, A. B. C Code, 4th & 5th edition

EQUIRING more room to enlarge our facilities for handling seeds and orders and to improve our service in every way, we transferred our Seed Department to this office on June 1st, 1911. With this transfer we have completely reorganized our Seed Department and we are now in a position to offer you the finest assortment of first class quality tree and shrub seeds and the best service possible.

We have increased our collecting fields and by many new improvements the work of collecting and handling our seeds is greatly facilitated, which enables us to furnish the large assortment in

quantities and at very low prices.

We do our best to send out sound and perfect seeds, but in the case of oaks, hickories and chestnuts the seeds are sometimes wormy, a defect that cannot be detected until the worm eats its way out, often after the seeds leave our hands. There are trees, too, that never perfect all their seeds—the Acer saccharum and Liriodendron are examples—and there is no way to separate the imperfect seeds.

are examples—and there is no way to separate the imperfect seeds.

Not less than one-quarter pound will be supplied at pound rates nor one-quarter bushel at bushel rates. Half ounces will be supplied at ounce rates where the price per ounce is not lower than 20c. SAT-ISFACTORY ARRANGEMENTS FOR PAYMENT MUST ACCOM-

PANY ORDERS FROM UNKNOWN CORRESPONDENTS.

When seeds are to go by mail, the charge is 9c. per pound additional in U. S. A. Canada 18c. per pound. All other foreign countries 12c. per pound for postage. Foreign P. O. orders payable at Philadelphia, Pa., U. S. A.

Germination of the Seeds

Seeds of deciduous trees and shrubs are best sown in the Fall, pines and similar evergreens in Spring, but deciduous ones will grow very well sown in Spring if kept in good condition through the Winter. When sown in Spring seeds of a hard, bony nature, such as the yellow locust, are best soaked in hot water for a day or two and then sown at once. Seeds of maples, ash, magnolia, beech, all nut trees, as well as many other kinds require to be kept slightly moist over Winter if not sown in Fall; on the other hand, catalpa and some others may be kept quite dry until Spring comes.

All Spring sowing should be early; even if the ground freezes later it won't injure the seeds at all.

Junipers, hollies and a few similar seeds remain a full year before sprouting. It is just as well, therefore, to keep them in a box of soil until the next Autumn, then sow them.

These directions should insure tolerable success in raising seedlings. The greater the experience, of course, the greater the success.

To germinate, seeds require certain conditions of moisture, temperature and time which they do not always meet with after sowing, hence fail to appear the first season. Examine them at close of Spring, and if found sound do not disturb them, and their germination may be looked for the season following.

Notice

We wish to remind our customers that while using our best efforts to supply such seeds as will prove satisfactory we give no warranty as to quality or productiveness or percentage of growth, there being too many causes known and unknown which prevent good seeds from germinating. Orders are accepted and shipped on these terms. Samples will be furnished when applied for. Should shipments received prove unsatisfactory from any cause, customers will kindly notify us within seven days, otherwise it is understood the seeds are accepted.

Our Reputation

Our firm has been in the seed and nursery business for over fifty years and has correspondents all over the world. We have still customers buying from us whose names were among the first on our books. Having 250 acres in nursery, we can make use of seeds unsold, enabling us to have fresh seeds to offer every season.

Conditions

All offers and acceptances of orders are subject to our receiving the full quantity for which we have placed orders with our growers and collectors. Failing to get these amounts, we reserve the right to reduce proportionately all orders that have been booked.
